

Wall of Cards - How high can you go?

Script: The walls of Jericho were tall and wide! The people marched around the walls once a day for six days. On the seventh day, they marched around 7 times. When the trumpets played and the people shouted, the walls came tumbling down. How tall can you build a wall of cards without it falling down? Will it fall if you march in place?

Supplies:

- A deck or two of cards
- You could also use plastic cups if you don't have cards

Instructions:

- Using cards or plastic cups, build the tallest wall you can!
- What makes the wall fall down?
- Will it fall if you march around it or jump over it?
